COLLABORATION KEY TO HOSPITAL’S COMPLETION

For the first time since 1962, HRH will open a new hospital!

In our history as a community health system, HRH has focused on growth and expansion to meet the ever-changing healthcare needs of the communities we serve. We were the first healthcare provider to bring many critical health services such as primary care and OB-GYN to Brownsburg with the opening of HRH Brownsburg in 1998. Since that time, we have continued to offer more providers, services and programs, at a pace matching the community’s rapid growth. HRH President and CEO Kevin Speer says “As a preferred healthcare provider in the town, we constantly engage with the individuals, families and businesses there to ensure we are responding to their health and wellness needs and helping to keep care local.”

HRH has envisioned a greater presence in Brownsburg for many years. As HRH monitored Brownsburg’s rapid growth the past couple of years, members of Management Council felt the timing was right to enhance our services in the area and invest in a significant project that would benefit the community by providing an enhanced variety of services. “We conducted focus groups in Brownsburg to gather information on services individuals in the community wanted to see offered locally and where they thought those services would be best located,” says HRH Vice President and Chief Strategy Officer Gary Everling. “Their feedback helped shape our services. In addition, the participants’ location of choice was the ground on the northwest corner of Interstate 74 and Ronald Reagan Parkway where the new HRH Brownsburg Hospital now sits. In several ways, the Brownsburg community played a role in the collaboration that developed the hospital.”

Opening in December, the 100,000 square-foot hospital will be among the most impressive healthcare facilities in the region – combining a modern healthcare delivery model with HRH’s award-winning approach to patient experience. Continuing with the trend we set in 1998, HRH is now the first healthcare provider to bring emergency services to Brownsburg. Modeled after how we know healthcare will be delivered in the future, the hospital will introduce a concept new to our area: an Emergency Department and an Immediate Care Center located side-by-side. Speer says “By packaging both emergency care and immediate care in one building, we afford patients the option to choose level of care with respect to their condition and their copay.”

The Brownsburg Hospital will address the needs and desires of the community with an emphasis on the continuum of care for families. The innovative facility will deliver healthcare in a new way, with easy access to several different services under one roof. In addition to the hybrid Emergency Department and Immediate Care Center, the hospital will host lab and radiology services, a comprehensive women’s center; physician offices; a six-bed inpatient medical unit; a multi-specialty clinic; and rehabilitation services. To further assist patients, the hospital will employ ambassadors who will help patients get to where they need to go. Executive Director of Professional Services Shane Sommers says “Healthcare is moving more toward a retail model in the delivery of service which means ease of access and the speed at which someone can get an appointment.”

Based on the feedback of the focus groups, women will find comprehensive health services at the Brownsburg Hospital. The facility will house offerings from obstetrics to gynecology to mammography and bone density testing, all in one, convenient location. Associates currently working at Brownsburg North Family Medicine, the Brownsburg Immediate Care Center and free-standing HRH Physical Therapy Brownsburg will transition to new offices at the hospital, as will the physicians at New Life Associates, currently working out of the HRH Brownsburg facility on Green Street. That facility, featuring a variety of physician offices and laboratory services, will remain open to serve the south side of Brownsburg and northwest side of Avon. “HRH Brownsburg Hospital is an extension of our strategic mission to improve the health of our Brownsburg neighbors,” says HRH Vice President of Nursing and Professional Services, Chief Operating Officer and Chief Nursing Officer Yvonne Culpepper. “By expanding our services in this rapidly-growing community, we are offering more opportunities for residents there and in nearby communities to stay local with care.”

The HRH Brownsburg Hospital created more than 130 jobs and its opening in December is expected to coincide with the extension of Ronald Reagan Parkway from US 136 to County Road 300 North. We invite all associates and members of the community to tour the new hospital during an Open House on Sunday, November 19.

SERVICES INCLUDE:
- Emergency Department
- Immediate Care
- Lab
