

As President and CEO of Hendricks Regional Health, I am thrilled to welcome you to the new Hendricks Regional Health Brownsburg Hospital. Since we first put down roots in Hendricks County in 1962, Hendricks Regional Health has been committed to delivering high-quality, comprehensive health care close to home.

Today, we bring an enhanced variety of services to the individuals, families and businesses in Brownsburg. This expansion holds a special place in my heart, as my family and I have been residents here for years. Hendricks Regional Health Brownsburg Hospital features a vast array of services including the only side-by-side Emergency Department and Immediate Care Center in the county, lab and imaging services, women’s services, physical and speech therapy, cardiac rehabilitation, an inpatient unit, primary care physician offices, sports medicine and much more.

While we have evolved over the years to meet the growing needs of the community, one thing remains consistent—our commitment to putting our patients first. In everything we do, our focus is always on you.

Hendricks Regional Health’s mission is to improve the health of our region through the provision of exceptional health care in a compassionate, technologically advanced and efficient environment. With an emphasis on providing ease of access for a full continuum of care, the Brownsburg Hospital continues our mission by giving our community the opportunity to stay local with care in one, convenient location.

Every day, we strive to be your local healthcare partner of choice. We look forward to serving you today and for many, many years to come.

Sincerely,

Kevin P. Speer | Hendricks Regional Health President & Chief Executive Officer
